

Csci 150 Intro to Software Engineering
Quiz 4 (Oct 23, 2018)
Name: _____

Choose ONE of the following TWO questions to answer.

1. At the beginning of Chapter 3, problems of agile method applied to software maintenance are discussed. An important problem is lack of formal documentation, which results in (1) maintainability; (2) Personnel turnover; and (3) assess the impact of changes. Can XP's features/practices solve the above 3 consequences of lack of formal documentation? If so, how? Please address EACH consequence specifically. (20 pts)
2. (a) Summarize scrum's activities in a sprint (diagram(s) and text explanation encouraged). (b) What are the responsibilities of a scrum master and product owner? (c) Compare XP and Scrum. (20 pts).

Answer for Q1: discussed in class. Also answers available in your midterm paper. Please note that my grading will be tougher than midterm.

Answer for Q2: (a) Please extend answer from page 66 of Ch3 slides (b) Please extend answer from page 68-71 of Ch3 slides (c) Please extend answer from page 80 of Ch3 slides

All of above need sufficient details to answer questions in final exam.
