

Csci 150 Intro to Software Engineering
Quiz 2 (Oct. 4, 2018).

Name: _____

1. Waterfall model is most suitable to large-scale software development. (a) Explain one reason why it is suitable. (b) Explain one reason why it is gradually replaced by incremental development model. (c) Apparently, your answer of (b) is one advantage of incremental model, list one reason why incremental development model still has room for improvement. (d) Incremental development model is an approach to tolerate changes. Then, how do we avoid changes?
 - (a) Documentation driven solves distributed locations among teammates. Plan based makes management easier and visible to manager.
 - (b) Changes requested by clients are more frequent to meet real world needs nowadays. But waterfall does not address changes of requirements.
